

Report: Gold Coast - Furniture

| Suburb / Node | Key Risk Category                               | Compliance Checklist / Metric                                                     | Requirements                                                                                   |
|---------------|-------------------------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Coomera       | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Helensvale    | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Hope Island   | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Nerang        | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Ormeau        | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Pimpama       | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
| Robina        | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement &<br>Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |

| Suburb / Node | Key Risk Category                               | Compliance Checklist / Metric                                                  | Requirements                                                                                   |
|---------------|-------------------------------------------------|--------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| Varsity Lakes | Industrial Noise & Fine Particulate Matter Risk | Boundary Acoustic dB Measurement & Baghouse Filter Differential Pressure Audit | Enclose high-noise machinery (CNC routers, planers) and monitor exhaust filter integrity daily |
