

Report: Sunshine Coast - Furniture

Suburb / Node	Key Risk Category	Compliance Checklist / Metric	Requirements
Beerburrum	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Beerwah	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Elimbah	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Eudlo	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Glass House Mountains	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Landsborough	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Mooloolah	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Nambour	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Palmwoods	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
Woombye	Combustible Dust Control & Air Quality Risk	LEV (Local Exhaust Ventilation) Particle Testing & Pressure Drop Log	Maintain dust extraction air velocity above 20 m/s at all extraction hoods
