Commute & Site Log

	≡ Audit Date	≡ Site Location	≡ Auditor ID	≡ Travel Time/Commute Distance	≡ Status (Completed / Scheduled)
1	📅 Thu, Jun 25, 2026 25.06.2026	Ipswich Node - Sector 6	AUD-BRIS-01	45 mins / 42 km	Completed
2	📅 Fri, Jun 26, 2026 26.06.2026	Moreton Bay Distribution Hub	AUD-BRIS-01	35 mins / 30 km	Completed
3	📅 Mon, Jun 29, 2026 29.06.2026	Sunshine Coast Logistics Facility	AUD-BRIS-02	1 h 15 mins / 90 km	Scheduled
4	📅 Tue, Jun 30, 2026 30.06.2026	Gold Coast Node - Sector 3	AUD-BRIS-02	1 h 5 mins / 80 km	Scheduled

Context

Python ▾

```
1 import pandas as pd
2 from fpdf import FPDF
3 from fpdf.enums import XPos, YPos
4
5 # List of all categories you need to process
6 categories = ['Plastic', 'Wooden', 'Food', 'Clothes', 'Furniture', 'Groceries']
7 filename_master = 'compliance datas collected for my key skills for decent compliance
  job(AutoRecovered).xlsx'
8
9 for category in categories:
10     # 1. Extract data for the specific sheet
11     try:
12         df = pd.read_excel(filename_master, sheet_name=category, header=1)
13     except Exception as e:
14         print(f"Could not find sheet for {category}: {e}")
15         continue # Skip to next category if sheet is missing
16
17     all_zones = df['Geographic Zone'].dropna().unique()
18
19     # 2. Batch Loop for Zones
20     for zone in all_zones:
21         regional_data = df[df['Geographic Zone'] == zone]
22
23         pdf = FPDF(orientation='L')
24         pdf.add_page()
25         pdf.set_font("helvetica", size=10)
26
27         pdf.cell(200, 10, text=f"Compliance Report: {zone} - {category}", new_x=XPos.LMARGIN,
new_y=YPos.NEXT, align='C')
28
29         # 3. Table Generation
30         columns = ['Suburb / Node', 'Key Risk Category', 'Compliance Checklist / Metric',
'Requirements']
31         with pdf.table(text_align="LEFT") as table:
```

```
32         header_row = table.row()
33         for col_name in columns: header_row.cell(col_name)
34         for _, row_data in regional_data.iterrows():
35             row = table.row()
36             for col_name in columns:
37                 row.cell(str(row_data.get(col_name, "")))
38
39         filename = f"Report_{zone.replace(' ', '_')}_{category}.pdf"
40         pdf.output(filename)
41         print(f"Generated: {filename}")
42
```

Field Operations Context:

- **Purpose:** This log tracks physical site audits across our four core Southeast Queensland jurisdictions to verify that on-site practices match our digital compliance master registry.
- **Data Alignment:** Completed logs for Ipswich and Moreton Bay match the automated data pipeline sweeps executed via `report_generation.py` and distributed on  Fri, Jun 26, 2026.
- **Distance Benchmarking:** Travel logs are monitored to calculate operational overhead and audit efficiency constraints for upcoming multi-jurisdictional mapping cycles.
