Operational Incident Log

Core System & Pipeline Exceptions Tracker

This log captures runtime exceptions triggered during automated execution sweeps of `report_generation.py` or email dispatch routing via `email_sending.py`.

	☰ Incident ID	☰ Log Date / Time	☰ Component / Sector Impacted	☰ Hazard / Error Description	☰ Operational Status
1	INC-2026-001	Thu, Jun 25, 14:15	<code>report_generation.py</code> (Plastic)	File Access Error: Sheet name mismatch found during runtime initialization loop.	Resolved (Sheet name hardcoded strings updated)
2	INC-2026-002	Fri, Jun 26, 09:30	<code>email_sending.py</code> (All Sectors)	Authentication Failure: Google SMTP connection rejected via 16-character relay portal.	Resolved (Rotated expired App Password token)
3	INC-2026-003	Fri, Jun 26, 11:02	Data Ingestion Pipeline (Groceries)	Null Value Exception: Blank rows identified in <code>Geographic_Zone</code> array column.	Resolved (Integrated automated <code>.dropna()</code> sanitation rule)
4	INC-2026-004	Sat, Jun 27, 16:00	Physical Field Audit (Ipswich Node)	WHS Delay: Traffic bottleneck along Ipswich Motorway delayed audit timing parameters.	Closed (Schedule modified and logged in Commute tracking)

▼ Incident Escalation & Post-Mortem Context

Automated Fault Isolation

- **Code-Level Resilience:** The `try-except` blocks written into your data engineering loops ensure that minor operational errors (like a missing row or structural text error) log an incident record instead of triggering a catastrophic system crash.
- **Fail-Safe Email Triggers:** If a regional dispatch script catches an error (`except Exception as e`), it triggers a high-priority incident notification to the systems admin dashboard rather than halting the remaining regional distributions.

Systems Integration Note at the Bottom

QA Continuity Loop

Every item flagged in this incident log must clear our internal **System Audit & Data Validation Checklist** guidelines before the pipeline status can be flipped back to "Stable." This prevents corrupt or malformed PDF report books from ever reaching our

regional municipal clients.
